CERTIFICATIONS

- Red Hat Enterprise Linux Administration
- AIX System Administration

TECHNICAL SKILLS

- Operating Systems: AIX, RHEL, OEL, Ubuntu, CentOS, VMware
- Server Hardware: DELL, IBM P-series
- File Systems: Ext3/Ext4/Btrfs/XFS/OCF S2
- Storage: GlusterFS, Ceph, NFS, ISCSI, DRBD
- Cluster: Luci, Pacemaker, PCS

EDUCATION

B.COM. (10+2+3),
UNIVERSITY OF CALCUTTA

PROFESSIONAL SUMMARY

IT Infrastructure Specialist with 19+ years of experience, including 15+ years in AIX & Linux administration and open-source projects within data center environments. Proven expertise in cloud platforms, virtualization, automation, and team leadership. Adept at managing complex infrastructure, driving operational excellence, and delivering robust solutions for enterprise clients.

CORE COMPETENCIES

- Linux & AIX Administration (RHEL, OEL, SUSE, CentOS, Ubuntu)
- AWS Cloud Services (EC2, IAM, AMI, Storage)
- Virtualization (VMware vSphere, Oracle VirtualBox, Vagrant)
- Containerization (Docker, Kubernetes, Swarm)
- Automation (Ansible, Puppet, Chef, SaltStack, Cf-engine)
- Monitoring Tools (Nagios, Zabbix, Cacti, Ganglia, Splunk)
- DevOps Tools Integration & CI/CD
- Server Lifecycle & Datacenter Management
- Security & Vulnerability Management
- Scripting (BASH, PowerShell)
- Revision Control (GIT, Subversion)
- Cluster & Storage Administration (Ceph, GlusterFS, Pacemaker)
- Service, Change & Problem Management

PROFESSIONAL EXPERIENCE

- Led Unix & Linux teams to support 24x7 server environments, ensuring high availability and zero SLA breaches
- Managed OS upgrades, datacenter migrations, server builds, patching, and decommissioning of legacy servers
- Oversaw vulnerability management, SSL renewals, RBAC, and printer server configuration
- Resolved complex Linux/AIX issues and participated in datacenter activities and service management processes
- Administered Oracle Private Cloud Platform and integrated DevOps tools in Kubernetes environments
- Architected and managed infrastructure for Linux/AIX, virtualization, Docker/Kubernetes, and AWS cloud platforms
- Conducted server lifecycle management, patching, firmware updates, and performance analysis
- Provided hardware, network, and software support as a resident engineer for client organizations
- Configured and administered Linux servers, troubleshooting OS and applications
